

COVID-19 Monoclonal Antibodies

Course Description:

The purpose of this webinar is to increase awareness of available monoclonal antibodies and provide discussion on implementing monoclonal antibody infusions within established healthcare organizations. This webinar is intended for healthcare providers, pharmacists, and pharmacy technicians.

Date/Time:

February 11, 2021

10:00am – 11:00am CT

Via live webinar; Register [HERE](#)

After the live webinar, this course will be available on-demand (home-study) at www.ceimpact.com through February 11, 2022.

Learning Objectives:

Upon completion of the webinar, learners should be able to:

- Discuss how to implement an outpatient monoclonal antibody infusion service within an established healthcare organization.
- Describe how to access bamlanivimab and/or casirivimab/imdevimab and identify the appropriate contact(s) who can assist with the process.
- List strategies to increase provider awareness and patient acceptance of COVID-19 monoclonal antibody therapies.
- Identify anecdotal treatment trends and outcomes realized by sites that have already implemented infusion services for monoclonal antibodies.
- Discuss opportunities for treating long-term care residents with COVID-19 monoclonal antibodies.

Faculty:

- Lisa Mascardo, PharmD, FASHP
University of Iowa Health Care
- Kathy Stone, PharmD, RPh, BCSCP
CHI Health Missouri Valley
- Following the CE session, Alexis Beyer, PharmD, MPH, CPH (U.S. Department of Health and Human Services); and Ronald Rideman, PharmD (Regeneron) will be available for a Q&A session.
